On July 10, 2006, AmerenUE filed an electric rate case with the Missouri Public Service Commission seeking to increase electric service revenues by approximately \$360.7 million. For the average residential customer, the proposed increase would be approximately \$6.00 a month.

The rate case filing also includes a request to implement a fuel adjustment clause. A fuel adjustment clause, if approved by the Commission, would allow increases or decreases in fuel and purchased power costs occurring after base electric rates are set by this current rate case to be passed through to customers as a separate line on customer bills. Increases in fuel and purchased power costs above base electric rates would be applied to customer bills via a separate and additional charge and decreases would be applied to customer bills via a credit.

AmerenUE serves approximately 1.1 million electric customers in Missouri.
